## PREPARATION FOR HYSTEOSALPINGOGRAPHY

### TREATMENT:

- **Fisionema Cassen** 250 c.c.
- **Augmentine** 875 mg
- If you are allergic to penicillin, take **Klacid** 500 mg

### INSTRUCTIONS:

- It's necessary to make the exploration 7-10 days after the menstruation.
- You should not have sex during these days.

### DAY OF EXPLORATION:

- 3 hours before the exploration you must put a Fisionema Cassen 250 c.c. to clean the intestines.
- Take 1 pill of Augmentine 875 mg 3 hours before the exploration and a second pill after 8 hours of the first.
- If you are allergic to penicillin, take Klacid 500 mg 3 hours before the exploration and a second pill after 8 hours of the first.
- Bring a pad to the center to use after the test.
